MEMORANDUM

TO: See list below

FROM: FA/Chairman, Apollo Software Control Board

SUBJECT: Flight Ropes for Apollo 16 and 17

It has long been our plan to utilize the Apollo 15 computer programs for Apollo 16 and 17, and nothing has happened in the last year to even suggest that is not the right thing to do. It is now time to fix the manufacturing schedule for the flight ropes such that all Apollo ropes will have been finished by January 1, 1972. E&D has the responsibility for doing this along with the Apollo Spacecraft Program Office.

The purpose of this memorandum is to state in writing with my signature affixed hereto that from a software standpoint, it is the proper thing to do and they should have at it. Colossus and Luminary are perfect!

Howard W. Tindall, Jr.
